invention disclosed in document 1, and could also configure so that the concentrated sulfuric acid is sprayed on instead of being mixed in during the decrystallization step, as necessary. In addition, it would have been easy for a person skilled in the art to conceive of using simulated moving bed chromatography in the light of the disclosures in document 2 cited in the international search report.

Such being the case, the inventions set forth in claims 2, 4 and 6 to 10 do not involve an inventive step.
